

Diversity, Equity and Cultural Competence in Classroom Instruction

Competency

Educators will develop and implement strategies to create a more culturally responsive, inclusive and equitable learning community for all students.

Key Method

Educators will reflect on teaching strategies and plans to enhance diversity, equity and cultural humility in their classrooms. They will envision what their classroom is like with these structures in place.

Method Components

What is DECC?

Diversity, Equity and Cultural Competence (DECC) are essential components of a thriving learning community.

- **Diversity** is the presence of differences that include race, ethnicity, gender identity and expression, age, national origin, religion, disability status, sexual orientation, socioeconomic status, language, physical appearance, and more. Diversity also involves different ideas, perspectives, and values. Being specific about which diversity is lacking in an area is critical. Saying “X” was not a racially diverse space, or “Y” event had little gender diversity helps clarify what is meant when we say, “diversity.”
- **Equity** refers to fairness and justice. It recognizes that advantages and barriers based on culture and identity exist. As a result, everyone does not

Diversity Equity and Cultural Competence

Last Revised on Apr 20, 2023

start from the same place in terms of having access to what they need to thrive and be well. It is a process that begins by acknowledging that unequal starting place and works to correct and address the imbalance. Creating equity is an ongoing process that strives to ensure that people who have been marginalized have ongoing opportunities to grow and thrive.

- **Cultural Competence** is the ability to understand, appreciate and interact with people from cultures or belief systems different from one's own.

Part of being culturally competent includes having cultural humility, a dispositional trait and allows us to be dynamic. "It takes the stance of being open to the "other" when interacting with people from different cultural backgrounds. Additionally, cultural humility lacks the superiority complex evident when an individual interprets their own cultural values as more meaningful and worthwhile than the values of others. Rather than concentrating solely on knowledge of another person's cultural background, cultural humility proposes openness and humility when engaging with individuals from a cultural background different from our own." *Source: Celebrating Cultural Humility in Education*

In this micro credential you will demonstrate your ability to support students on a variety of topics related to diversity, equity and cultural competence.

Diversity, Equity and Cultural Competence in Classroom Instruction

"The work of being a culturally responsive educator isn't simply about diverse books or social justice curriculum topics. It's about gaining insight into your students as learners and being able to craft cognitive hooks between their funds of knowledge and the standards-based content in authentic and meaningful ways that make learning sticky." — Zaretta Hammond

DECC is integral to being a skilled educator. In today's global and interconnected society, educators must be constantly growing in their ability to teach students and groups who are culturally different from them. Educators should:

- Understand culture and its predominant impact on individuals and groups of people.
- Understand how the dominant culture can privilege or oppress individuals and groups of people.
- Be prepared to take action to:
 - Expose and address inequity in the educational system
 - Collaborate purposefully with individuals and groups from cultures and identities that have experienced historical and present day social injustices and inequalities (i.e., ableism, racism, transphobia, heterosexism, classism, etc.)

Diversity Equity and Cultural Competence

Last Revised on Apr 20, 2023

- Work to create and support policies and practices that give rise to culturally inclusive and equitable learning environments.

Types of Diversity

It is important to note that there are many different types of diversity, and it is critically important that we are specific when discussing or describing them. Saying “X” was not a culturally diverse space, or “Y” event had little religious diversity helps clarify what we mean when we say, “diversity.” There are many different ways that people and groups identify themselves. Here are a few examples of ways diversity may show up in your classroom:

- Race
- Ethnicity
- Culture
- Religion
- Age
- Sex
- Gender identity and expression
- Sexual Orientation
- Disability status (developmental disability and/or acquired disability)
- National origin

Culturally Responsive Teaching

Culturally Responsive Teaching (CRT) is an evidence-based pedagogy that is inclusive of students’ culture across all aspects of teaching and learning. CRT fosters a classroom climate that promotes diversity, equity, inclusion and cultural competence. These are the seven principles for CRT:

- Students are affirmed in their cultural connections
- Teachers are personally inviting
- Learning environments are physically and culturally inviting
- Students are reinforced for academic development
- Instructional changes are made to accommodate differences in learners
- Classrooms are managed with firm, consistent, loving control
- Interactions stress collectivity as well as individuality

Source: Creating Culturally Responsive Classrooms, 1997, Shade, Kelly, and Oberg

Strategies that Support a Culturally Inclusive Learning Environment

The following strategies can be deployed to create a culturally inclusive learning environment:

- Spend time getting to know your students
- Plan activities that help students to get to know each other
- Be aware of your own biases
- Use active learning strategies such as group work, debates, student presentations.

Except where otherwise noted, this work is licensed under:

<http://creativecommons.org/licenses/by-nc-nd/4.0/>

Diversity Equity and Cultural Competence

Last Revised on Apr 20, 2023

- Use a variety of teaching strategies that support varied learning styles
- Use multiple assessment measures
- Listen to your students
- Teach students how to listen to each other
- Engage families and community members in classroom and school activities
- Incorporate student voice into your daily practices
- Build lessons and activities that allow for student choice
- Use a strengths-based approach to learning

Classroom Management

Effective classroom management is rooted in strong relationships between students, educators and families. Sadly, research routinely shows dramatic disparities in discipline for students of color and students with disabilities when compared to white students. While educator bias and lack of using other behavior intervention strategies (e.g., restorative practices, social workers and school counselors) are often cited as causes, the figures reveal a glaring trend across the U.S. Consider:

- In the 2015–16 school year, students with disabilities accounted for 12% of all students, but 28% of all referrals to law enforcement and arrests
- In the same school year, studies show Black students and other students of color lost significantly more days of instruction due to discipline than white students. For example, Black students lost 103 days of instruction per 100 students enrolled, while white students lost 21 days per 100 students enrolled because of out-of-school suspensions.

Creating a culturally inclusive classroom depends on many factors. Classrooms that foster strong relationships, inclusion, safety and support create affirming environments for students. Structure and routine with fair and consistent rules and expectations can help to foster a safe and supportive classroom environment. When combined, these actions create conditions for effective classroom management where students are ready to engage in learning.

Tips for Inclusive Classroom Management

- Develop a list of classroom norms and values with students
- Include behavioral expectations and norms that are culturally-inclusive and appropriate or otherwise reflective of the diverse cultures and identities of students in the classroom
- Share your behavior plan with your administration, students, and families.
- If you have students whose behavior is interfering with their learning and others trying to learn, seek support and/or advice from your school's Multi-Tiered System of Support (MTSS) plan.
- Use restorative practice principles as a foundation for your classroom management

Diversity Equity and Cultural Competence

Last Revised on Apr 20, 2023

- Analyze your discipline data to assess for disproportionalities based on race, gender identity, ethnicity, sexual orientation, disability status, and other social identities and make changes to support equitable disciplinary outcomes
- Avoid exclusionary discipline (office referrals, expulsions, suspensions)
- Focus on building a community of learners and healthy relationships
- Help your students understand that equity is not the same as equality
- Invite students and families to participate in the development of your behavior management plan

Culturally Inclusive Curriculum

Not only is it important to create a culturally inclusive environment, it is also important to use a culturally inclusive curriculum. A culturally inclusive curriculum is non-negotiable when creating an equitable learning environment that also celebrates diversity. Curriculum should be inclusive, rigorous, diverse and student centered. This type of curriculum promotes student engagement, academic achievement, empathy, critical thinking, and more. An inclusive curriculum has a positive impact on all students. By using an inclusive curriculum, you are helping all of your students to:

- Embrace and fully develop their sense of self
- Strengthen their self-esteem and value the humanity of others
- Build and maintain healthy relationships
- Develop empathy skills
- Gain comfort with people who are both similar to and different from them

Strategies for Creating an Inclusive Curriculum

To create an inclusive curriculum, educators need to be intentional about including a variety of perspectives, sources, instructional tools, and more. The following strategies can help you get started:

Mirrors, Windows and Sliding Glass Doors

In her 1990 [essay](#) of the same name, Dr. Rudine Sims Bishop coined the phrase “Mirrors, Windows, and Sliding Glass Doors” to explain how children see themselves in books and how they can also learn about the lives of others through literature. Bishop says it’s crucial for children of color and those from marginalized groups to view themselves in the books they read. When books don’t serve as **mirrors** to children, [Bishop says](#), “They learn a powerful lesson about how they are devalued in society.” Books, she says, also serve as **windows** that give readers a glimpse into the lives and experiences of others.

In this context, educators have the critical task of making sure their students have access to books that serve as both windows and mirrors that reflect their own experiences and windows to help them learn about people and/or cultures that are different from their own. These are some benefits of this strategy:

Diversity Equity and Cultural Competence

Last Revised on Apr 20, 2023

- Students will relate and make connections to the content being taught
- This helps your students honor and value who they are
- Develops empathy in students
- Supports self-esteem development in students
- Supports the development of self-awareness in students
- Supports the development of healthy interpersonal relationships
- Gives students opportunity and exposure to life experiences different from their own

Universal Design Learning (UDL) Principles

This set of principles is based on the idea that all students are different and unique and have their own way of learning. The three main UDL principles:

- Representation (the what of learning)
- Action and Expression (the how of learning)
- Engagement (the why of learning)

Mix it up

Mix It Up refers to the use of a variety of strategies to present and assess students. These are some examples:

- Include multiple choice and written response questions on assessments
- Provide options for formative assessment projects
- Present materials using visual and auditory information
- Provide students with manipulatives and live models for a hands-on-experience

Provide Accommodations

You may have students on an IEP or 504 plan. You are legally responsible to know what is included in the plan and to provide the prescribed accommodations for the student in your classroom.

Behavior Management Plan

Sometimes students present with behaviors that adults deem as disruptive or challenging in the classroom. These behaviors can sometimes interfere with student learning. It is important that educators respond to student behaviors with curiosity, and not judgement, about what unmet needs may be underlying the behavior, and avoid labeling the behavior or the student as “bad.” In these situations, ask yourself, “What might the student be trying to communicate with this behavior?” and “How can I help the student with getting their needs met?” It can be helpful to engage the student in a similar line of questioning to support them in communicating what their needs are. It is also helpful to provide feedback to the child on how they can communicate the need in a way that is safe and in alignment with classroom norms.

With children and adolescents, significant emotional distress or mental health conditions can be manifested in their behavioral expressions. When students consistently engage in behaviors that get in the way of their social, emotional,

and/or learning needs, it can be helpful to refer the students to mental health supports (i.e., a student support team).

Submission Guidelines & Evaluation Criteria

To earn the micro-credential, you must receive a passing score in Parts 1 and 3, and be proficient for all components in Part 2.

Except where otherwise noted, this work is licensed under:

<http://creativecommons.org/licenses/by-nc-nd/4.0/>

Diversity Equity and Cultural Competence

Last Revised on  Apr 20, 2023

Part 1. Overview Questions (Provides Context)

(300-600 words)

Please use the suggested word count as a guide to answer the following contextual questions. This will help our assessor understand your current context for working on this micro-credential.

Please do not include any information that will make you identifiable to your reviewers.

- Describe your professional context. What is your current educational assignment? Who are your students? Briefly describe your school climate and culture.
- Why did you choose to learn about this micro-credential? How do you think your students will be impacted by your learning?
- Describe your current classroom climate.
 - How does this classroom environment promote and advance the concepts of diversity, equity, and cultural competence?
 - What does it look like/sound like/feel like as a learner?
 - What does it look like/sound like/feel like as an educator?

Passing: Response provides reasonable and accurate information that justifies the reason for choosing this micro-credential to address specific needs of both the teacher and the student. A learning goal that describes what educators hope to gain from earning this micro-credential needs to be clearly stated. Current classroom culture should be described using specific details from the current professional context.

Part 2. Work Examples/Artifacts/Evidence

To earn this micro-credential, please submit the following three artifacts as evidence of your learning.

**Please do not include any information that will make you or your students identifiable to your reviewers.*

Artifact 1: Teaching Strategies Infographic

- Choose three teaching strategies or classroom constructs from the resources provided. These strategies need to embrace and leverage diversity, advance equity, and/or promote cultural competence and humility for all learners.
- Implement these strategies
- Create an infographic that describes these strategies. Your infographic should include:
 - Description of each strategy
 - Reasoning for implementing each strategy
 - Results of the implementation

Except where otherwise noted, this work is licensed under:

<http://creativecommons.org/licenses/by-nc-nd/4.0/>

Diversity Equity and Cultural Competence

Last Revised on Apr 20, 2023

Artifact 2: Share Infographic (200-400 words)

Describe the plan to share your infographic. Your response needs to answer all of the questions below.

- Who is your audience?
- Why did you choose this audience?
- How many and who will be in your audience?
- How will you share it? (print, in-person, virtually...)
- What follow-up will you do?

Artifact 3: Self-Assessment and Plan or Resource.

Read the ADL, “Creating an Anti-Bias Learning Environment” document. Then, use the checklist located on p. 4–5 of the document to assess yourself or your school (choose one or the other). Upload the completed checklist to nea.certificationbank.com

Artifact 4: Plan or Resource

Choose two topics that fall under “I/We haven’t thought about this” or “I/We need to do this better.”

- If the topics are for your classroom, find or create a resource or lesson plan to share with your students.
- If the topics are for your school, find or create a resource or lesson plan to share with your school colleagues.

Artifact 5: Response to Questions (150-300 words)

Answer the following questions

- What are the self-assessment piece(s) that you addressed?
- How did your plan address the topics you identified?
- What else can you do to address these topics?
- What feedback did you receive from your students/colleagues at school?

Artifact 3: Ideal Classroom Environment Vision (400-600 words)

Now that you have spent time learning about diversity, equity and cultural competence, write a vision that describes your ideal classroom. Then compare and contrast it with the description of your current classroom environment, that you wrote about in part one of this micro-credential.

Part 1 Vision

- How does your vision promote and advance the concepts of diversity, equity, and cultural competence?
- What will it look like/sound like/feel like as a learner?

Except where otherwise noted, this work is licensed under:

<http://creativecommons.org/licenses/by-nc-nd/4.0/>

Diversity Equity and Cultural Competence

Last Revised on Apr 20, 2023

- What challenges or obstacles will you need to overcome to realize your vision?

Part 2 Compare and Contrast

- What is already part of your classroom environment?
- What will still need to be put in place?
- What steps will you take to bring your vision to fruition?
- What resources will you use to support your vision?

Part 2. Rubric

| | Proficient | Basic | Developing |
|----------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| Artifact 1: Teaching Strategies Infographic | <p>Includes three strategies or constructs that embrace and leverage diversity, advance equity, and/or promote cultural competence for all learners.</p> <p>And</p> <p>Detailed descriptions</p> <p>And</p> <p>Reasoning</p> <p>And</p> <p>Results</p> <p>And</p> <p>Is layed out in a thoughtful and organized manner.</p> | <p>Includes three strategies, basic descriptions, and some experiential commentary</p> <p>Includes three strategies or constructs</p> <p>And</p> <p>Descriptions</p> | <p>Includes less than three strategies or constructs.</p> <p>And/or is missing descriptions.</p> |

Part 3 Reflection

(300-600 words)

Use the word count as a guide to write a personal reflection about your work on this micro-credential. For tips on writing a good reflection, review the following resource:

[How Do I Write a Good Personal Reflection?](#)

Please do not include any information that will make you identifiable to your reviewers.

1. Did you learn what you expected? Why or why not?
2. How has working on this micro-credential impacted your students?
3. How will you continue to implement strategies and supplement your curriculum to advance the concepts of diversity, equity, and cultural competence?
4. How will you advocate for inclusive curriculum and culturally responsive teaching in your school and/or district?

Passing: Reflection provides evidence that this activity has had a positive impact on both educator practice and student success. Specific examples are cited from personal or work-related experiences to support claims. Also included are specific actionable steps that demonstrate how new learning will be integrated into future practices.
