

Culturally Relevant Pedagogy with Primary Sources

Educators with no foundational training in teaching inquiry with primary sources from the Library of Congress may wish to begin with the Inquiry with Primary Sources TPS micro-credential prior to completing this one.

Competency

Educator uses primary sources and inquiry strategies to craft culturally relevant instruction.

Key Method

Educator develops and analyzes a lesson that incorporates the three tenets of culturally relevant pedagogy with primary sources.

Method Components

Culturally Relevant Pedagogy

Culturally relevant pedagogy (CRP) is a framework developed by Dr. Gloria Ladson-Billings as a result of her research of highly effective teachers of African American students, documented in her book *Dreamkeepers*. The framework has three tenets of culturally relevant teaching.

Except where otherwise noted, this work is licensed under:

Teaching with Primary Sources

Last revised on: May 30, 2022

Tenet 1: All students experience academic success.

Students in classrooms grounded in CRP are academically successful. This means that teachers hold all students to high expectations and provide them with appropriate scaffolding to reach those expectations. Teachers occupy the role of the “warm demander” - providing students with love and relentlessness in the expectation that students work at the edges of their abilities. These teachers approach their students with an asset-based lens and emphasize the importance of higher-order thinking skills.

Tenet 2: Students develop their own cultural competence.

Classrooms grounded in CRP support and enable students to develop and further their own cultural competence and that of at least one other culture.

“Teachers who are prepared to help students become culturally relevant are themselves culturally competent... They know enough about students' cultural and individual life circumstances to be able to communicate well with them. They understand the need to study the students because they believe there is something there worth learning. They know that students who have the academic and cultural wherewithal to succeed in school without losing their identities are better prepared to be of service to others...”

- [Gloria Ladson-Billings, 2001](#)

Students' lives are at the core of the curriculum. Students are not expected to give up aspects (like culture, language, etc.) of who they are to succeed academically. Students see aspects of their identities mirrored in the curriculum, reading texts, assessments, and classroom environment. Teachers understand the importance of showing students both mirrors to their own lived experiences in the content they learn and windows into the experiences of others. Difference is not seen as a threat, but rather an opportunity to experience and enjoy a variety of human identities and ways of being.

Tenet 3: Students examine and critique the status quo.

In classrooms grounded in CRP, students examine the existing social order and are provided with guidance and opportunity for critique. The curriculum reflects the real world and the real world is central to the curriculum. Students are provided with the tools to examine and question what is considered "normal", "truth", and "the way things are". Students discuss, question, reimagine, critique, and work to solve problems in their world.

Teaching with Primary Sources

Last revised on: May 30, 2022

Primary Sources

Primary sources, [as described by the Library of Congress](#), “are the raw materials of history — original documents and objects that were created at the time under study. They are different from secondary sources, accounts that retell, analyze, or interpret events, usually at a distance of time or place. Bringing young people into close contact with these unique, often profoundly personal documents and objects can give them a sense of what it was like to be alive during a long-past era. Helping students analyze primary sources can also prompt curiosity and improve critical thinking and analysis skills.”

Inquiry Learning

Inquiry is a process of active learning that is driven by questioning and critical thinking that leads to increased student engagement and deeper understanding of content. Inquiry learning is a recursive and reflective process.

Primary sources represent authentic voices and images that engage students both emotionally and personally, naturally engaging them in inquiry as they question, make inferences, interpret different points of view, use critical thinking skills to analyze and evaluate, draw conclusions, and build bridges between past and present.

Submission Guidelines & Evaluation Criteria

To earn the micro-credential, you must receive a passing score in Parts 1 and 3, and receive proficiency for all components in Part 2.

Part 1. Overview

(300-600 words)

Please copy and paste the following contextual prompts and questions into a document and respond to them without including any identifying information.

1. Describe the climate and culture of your school as it relates to staff and students.
2. List the grade(s) and subject(s) that you teach and general information about your class composition.
3. Describe your current understanding of culturally relevant pedagogy (CRP).
4. List the possible cultures with which your students identify, then answer the following questions.
 - What resources have you used to reflect your students' cultural identities, as well as knowledge about other cultures?
 - How have you provided ways for your students to see themselves in your lessons?
 - What opportunities have you provided for understanding other cultures?

Passing: Responses provide reasonable and accurate information that justifies the reason for choosing this micro-credential to address specific needs of both teacher and students, including areas of instruction that could be enhanced through integration of CRP.

Part 2. Artifacts

To earn this micro-credential, please submit the following **5** artifacts as evidence of your learning. *Please do not include any identifiable information.*

Artifact 1: Cultural Identity Beliefs Chart & Beliefs Impact T-Chart

Except where otherwise noted, this work is licensed under:
<http://creativecommons.org/licenses/by-nc-nd/4.0/>

Teaching with Primary Sources

Last revised on: May 30, 2022

1. Open with Google Docs or download the [Cultural Identity Beliefs Chart](#), and complete it to reflect on your cultural background.
Note: Please do not include any information that you would not feel comfortable sharing with others.
2. Download or make a copy of the [Beliefs Impact T-Chart](#), and complete it to create a list of positive and negative ways your beliefs could impact your students.

(See rubric for specific requirements.)

Combine both documents into a single document file for upload.

NOTE: Take a screenshot or picture of your completed Cultural Identity Beliefs Chart and insert the images below the completed Beliefs Impact T-Chart.

Artifact 2: Lesson Planning Document

1. Review the [Example Lesson: Outline Culturally Relevant Pedagogy with Primary Sources](#).
2. Now find an existing lesson from your curriculum, ideally one that you will be teaching soon and, if possible, that includes exploration with primary sources from the Library of Congress or an affiliated repository (see Resources).
3. Download or make a copy of the [Culturally Relevant Pedagogy with Primary Sources Lesson Planner Template](#), and use it to show evidence of, or lack of, the three tenets of CRP and primary sources from the lesson you selected to analyze.
4. Based on your review, jot down ideas for revising the existing lesson or creating a new lesson plan to include the three tenets of CRP and primary sources from the Library of Congress or an affiliated repository that your students can identify with and gain knowledge and understanding from one other culture.

(See rubric for specific requirements.)

Upload your completed lesson planning document.

Artifact 3: CRP with Primary Sources Lesson Plan

Use your completed planner to help you create a culturally relevant pedagogy with primary sources lesson plan. You may use your preferred lesson plan format as long as it includes all of the criteria listed in the rubric.

(See rubric for specific requirements.)

Except where otherwise noted, this work is licensed under:
<http://creativecommons.org/licenses/by-nc-nd/4.0/>

Teaching with Primary Sources

Last revised on: May 30, 2022

Upload your CRP with Primary Sources Lesson Plan.

Artifact 4: Lesson Evidence

If possible, implement your lesson plan and submit 4-6 examples of student work or a video of lesson implementation (follow your district's privacy policies, procedures, and guidelines when recording video of students).

If you are unable to implement the lesson, identify 2 colleagues willing to complete a peer review of your lesson plan. Provide each with a copy of your lesson plan and a copy of the [Peer Review Template for Culturally Relevant Pedagogy Lesson](#). Be sure to point out any specific areas where you'd like targeted feedback.

(See rubric for specific requirements.)

Combine each piece of evidence into one document for uploading.

NOTE: To submit handwritten student work or completed peer reviews, simply take pictures of each piece of evidence and insert the files into a single document. To submit video evidence, load it to a shareable platform and enter the shareable link in a document along with a brief description of the evidence. Make sure that the video is not set to Private, as it will need to be accessed by members of our Assessment Team anonymously. If the video is set to require a password to access it, please include the password below the link in the document. Click the linked site names for step-by-step instructions on uploading and sharing a video on [YouTube](#) or [DropBox](#).

Artifact 5: Lesson Analysis

After reviewing student work, lesson implementation video, or the peer reviews, next download or make a copy of the [Analysis of Culturally Relevant Pedagogy with Primary Sources Lesson Template](#) and use it to discuss what the process was like for you to teach or receive feedback, and how you'll modify your lesson plan as a result.

(See rubric for specific requirements.)

Upload your completed lesson analysis.

Part 2. Rubric

Assessors will use the rubric to determine competency, so be as specific as possible.

Part 3. Reflection

(300-600 words)

Please copy and paste the following reflective prompts into a document and respond to them without including any identifying information.

Consider how inquiry-based learning using primary sources supports culturally relevant pedagogy. Then address the following:

- Describe how implementing CRP and the use of primary sources within lessons can impact the relationships educators have with their students.
- Explain how CRP can create a positive self-identity, greater understanding among students, and prepare them for life after school.
- Create a SMART goal (Specific, Measurable, Achievable, Realistic, and Timely) for implementing the use of primary sources and inquiry strategies to craft culturally relevant instruction in the future.

Passing: Reflection provides evidence that this lesson has had a positive impact on both educator practice and student success. Specific examples are cited directly from personal or work-related experiences to support claims. Also included are specific actionable steps to demonstrate how new learning will be integrated into future practices.
