Formative and Summative Assessment Using Arts Integration

Educator demonstrates how using an art form can enhance traditional formative and/or summative assessment of student learning.

Key Method

The educator designs assessments using art forms to support learning in content areas. The educator uses a growth mindset in creating learning plans that dynamically shift to address student abilities and expected growth based on assessment. The educator then uses assessment to provide feedback to students, which enhances learning.

Method Components

Educators understand that building strong relationships with students, while assessing student learning in authentic ways based on student ways of knowing and doing, effectively supports achievement. They recognize that providing feedback to students in positive ways contributes to student motivation and success. Educators know that using multiple assessment methods provides information about skill and understanding; using artistic expression to demonstrate knowledge can deepen understanding for both the teacher and the learner.

Components of Assessment Using Arts Integration

- Students demonstrate knowledge on a regular and ongoing basis.
- Students use multiple methods to show what they know.
- Assessments support learning through reflection.
- Assessments include goal-setting.
- Assessments support accountability.
- Assessments may be interdisciplinary.
- Assessments are in direct correlation to teaching strategies and skills learned.
- Students show their understanding of a content area through an art form.
- Students demonstrate understanding rather than recite information.
- Assessments are original creations versus recitations.
- Assessments meet objectives in the content area and in an art form.

Arts Integration versus Arts Enhancement

"(Arts) enhancement is where the arts are simply supporting the content area but are not being assessed. (Arts) integration is where both the art and the content area have objectives and both are being assessed." — Education Closet
According to the Kennedy Center for the Performing Arts, arts integration is defined as an "approach to teaching in which students construct and demonstrate understanding through an art form. Students engage in a creative process which connects an art form and another subject area and meets evolving objectives in both.”

### Supporting Research

The article discusses the Artful Learning Communities project, which aimed to help elementary and middle school arts teachers assess learning in the arts, promote student art achievements through assessment, and develop the ability of teachers to systematize their assessment through the use of feedback.

In this article, the author discusses the benefits of arts integration; emphasizes that arts integration requires careful thought, planning, and assessment; and provides an example of a successful collaboration between arts providers, schools, a county office of education, and the University of California, in which professional development is provided to educators during an intensive summer institute and a follow-up session during the fall.

Submission Guidelines & Evaluation Criteria

To earn the micro-credential, you must receive a passing score in Parts 1 and 3 and receive a proficient for all components in Part 2.

Part 1. Overview Questions

250-word limit

Please answer the following contextual questions to help our assessor understand your current situation. Please do not include any information that will identify you to your reviewers.

1. Describe your current teaching assignment, including the grades or levels taught and subject(s).
2. Describe any cultural and/or background information about your demographic as it relates to your teaching assignment. Add any special considerations and accommodations that support learners in your classroom.

3. How does your learning plan reflect authentic and artistic assessment?

4. Describe your learning goal for earning this micro-credential, and share what you hope to gain from this learning.

   - **Passing:** Response provides reasonable and accurate information that justifies the reason for choosing this micro-credential to address specific needs of both the teacher and the student. Educator includes a learning goal that describes what they hope to gain from earning this micro-credential.

### Part 2. Work Examples / Artifacts

To earn this micro-credential, please submit the following three artifacts as evidence of your learning. Please do not include any information that will identify you or your students to your reviewers.

#### Artifact 1: Lesson Plan

Connect evidence of student learning that shows understanding of the content area through the art form. Discuss (using the key elements listed in Method Components) the relationship between student learning, lesson planning, and student achievement that develops when teaching in and through an art form (600-word limit).

#### Artifact 2: Assessment Design

Choose ONE of the following to show how you design assessments using art forms that show deep understanding for both the teacher and the learner. (Take care to protect student identity.)

- Upload a two- to a four-minute video showing one or more students engaged in artistic expression as a form of assessment. At the beginning of (and/or throughout) the video, narrate or display information to explain the connection to the content area (follow your district’s policy for video with students).
- Share, in a photo essay of at least 10 and no more than 20 slides, student work samples that indicate a deep knowledge of content expressed through an art form. Include text or captions on each slide to guide the assessor (follow your district’s policy for photography with students).
- Upload a lesson plan that contains assessment(s) of learning using art forms.

#### Artifact 3: Written Analysis

Connect your choice in the second option (video, photo essay, or lesson plan) to a written analysis (600-word limit) that includes the following information:

1. How you inform your instructional practice based on the integration of an art form with your content area
2. How your assessment(s) support learning through reflection
3. How your assessment(s) include goal-setting
4. How your assessment(s) support accountability
5. How your assessment(s) are in direct correlation to teaching strategies and skills learned
6. How students demonstrate understanding as opposed to reciting information
7. How your assessment(s) are original creations rather than recitations

How your assessment(s) meet objectives in both the content area and an art form

**Artifact 2:**
Assessment Design,
Video Option
### Artifact 2: Assessment Design, Photo Essay Option

**Photos show documentation of your process creating and implementing your arts integrated lesson.**

**Art forms documented show a deep understanding of the connection between the content and the art form for both the teacher and the learner.**

**There are at least 10 and no more than 20 photos.**

**All photos are captioned with complete sentences.**

**Narration or display of information to explain the connection between the art form and the content area is at the beginning and throughout the video.**

**Process is documented but incomplete and missing some components.**

**Photo essay does not contain correct number of photographs.**

**Captions do not sufficiently demonstrate process.**

**Some or all captions are missing.**

**Photo essay does not contain correct number of photographs or photos and/or captions are omitted.**

**Photos are not related to the lesson.**

### Artifact 3: Written Analysis

**Analysis contains all the following points:**

- Rationale used to inform your instructional practice based on the integration of an art form to content
- In what ways does this lesson support elements of Constructivism?
- How this lesson shows how students made connections between the art form and the content
- How students constructed and

**Analysis contains 7 to 9 of the following points:**

- Rationale used to inform your instructional practice based on the integration of an art form to content
- In what ways does this lesson support elements of Constructivism?
- How this lesson shows how students made connections between the art form and the content
- How students constructed and

**Analysis contains fewer than 7 of the following points:**

- Rationale used to inform your instructional practice based on the integration of an art form to content
- In what ways does this lesson support elements of Constructivism?
- How this lesson shows how students made connections between the art form and the content
- How students constructed and
Reflection

500-word limit

Please answer the following reflective questions. Please do not include any information that will identify you to your reviewers.

Based on your experiences, share how teaching in and through an art form and using an art form as a means to assess knowledge in your content area impacts understanding for both you and your students. Discuss advantages and limitations you encountered and solutions or accommodations you made or will make in your future practice. Include anecdotal student-related information to support this approach to teaching.

- **Passing:** Reflection provides evidence that this activity has had a positive impact on both educator practice and student success. Specific examples are cited directly from personal or work-related experiences to support claims. Also included are specific actionable steps that demonstrate how new learning will be integrated into future practices.
