

Understanding and Applying the Five Knows of Collaborative Teaming for Success

Competency

Paraeducators and teachers understand and apply the five "knows" of collaborative teaming to improve the effectiveness of their team.

Key Method

Paraeducators and teachers collaboratively use a five-step inquiry learning cycle to understand and apply the five "knows" of collaborative teaming and create an action plan to improve team effectiveness.

Method Components

Guiding Principles

To enhance student outcomes, it is critical that paraeducators and teachers see themselves as partners in the educational process and continuously work to ensure they have an effective working relationship.

Creating a team approach to learning is complex and challenging. While many of the factors that contribute to these challenges are systemic and out of the control of paraeducator-teacher teams (e.g., the need for smaller class sizes, resources, professional learning, and planning time), there are things that teams can control.

Building Winning Teams: Effective Paraeducator-Teacher Teams

Last Revised on Nov 13, 2022

According to the article [The Four 'Knows' of Collaborative Teaching](#), there are four essential areas that educators need to "know" to be successful in creating and maintaining effective partnerships: 1) "know" yourself, 2) "know" your partner, 3) "know" your students and 4) "know" your stuff. NEA has adapted this list to include: 5) "know" your why. While the article focuses on co-teaching partnerships in secondary schools, the suggestions are relevant to any partnership including paraeducator teacher teams.

See the Research and Resource sections to learn more about the "knows" of collaborative teaching and teaming.

Note: Paraeducators support certified/licensed educators, including teachers and other related service providers. Teams participating in the micro-credential process can also include related service providers, although the design of some of the micro-credentials and related artifacts are specific to the partnership between paraeducators and teachers. Related service providers might include speech-language pathologists, school nurses, transition specialists, school psychologists, school social workers, creative arts therapists, occupational therapists, physical therapists, and school counselors. Most of these professions are currently defined as "providers of related services" in the Individuals with Disabilities Education Act (IDEA, 2004) and "specialized instructional support personnel" (SISP) in the Every Student Succeeds Act (2015). NEA and the National Alliance of Specialized Instructional Support Personnel (NASISP) both recognize and use the term SISP. See the Resource Section to learn more about SISP.

The Inquiry Learning Cycle

For this micro-credential, paraeducators and teachers will use a five-step inquiry learning cycle to demonstrate an understanding of the five "knows" of collaborative teaming and create an action plan to improve team effectiveness.

Paraeducators and teachers will assess their team using an inventory worksheet, explore a need for growth or improvement, identify and target a goal for enhancing team performance, and develop and implement a team action plan. Lastly, paraeducators and teachers will reflect on the outcomes and process. See the Resource section to learn more about the inquiry learning cycle.

Building Winning Teams: Effective Paraeducator-Teacher Teams

Last Revised on Nov 13, 2022

Step 1- Know Yourself {Individual inventory}

The first step in the inquiry cycle is to know yourself. In this step, you will use a checklist to assess (from your perspective) if each of the characteristics of effective teams applies to your team. You will also identify those characteristics that you think impact your team's effectiveness in meeting student outcomes.

Step 2 - Know Your Team (Team Process)

The second step in the inquiry cycle is to know your team. In this step, paraeducator-teacher teams will discuss their checklists in order to come to a consensus on which characteristics and related issues and challenges are impacting team effectiveness, in preparation for identifying a growth goal (Step 3) for the team action plan.

Since each team member will view issues and challenges from a unique perspective, it is important that each team member has a voice in this discussion.

When prioritizing issues and challenges related to the characteristics of effective teams, team members should consider the following questions:

- What is our current process for ensuring our team puts into practice the characteristics of effective teams?
- What is working in our current teaming situation? What is not working?
- What specific issues are we having? What factors may be contributing to these issues?
- Who is involved (e.g., students, other staff, families/guardians)?

Except where otherwise noted, this work is licensed under:

<http://creativecommons.org/licenses/by-nc-nd/4.0/>

Building Winning Teams: Effective Paraeducator-Teacher Teams

Last Revised on Nov 13, 2022

- What supports/resources does our team need that we aren't currently getting? How can administrators or other staff help support our team?
- How are the issues and challenges affecting outcomes for students and our team?

Step 3 - Establish a Growth or Improvement Goal (Team Process)

The third step in the inquiry cycle is to establish a SMART goal (Specific, Measurable, Achievable, Relevant, Time-bound) for the team action plan (Step 4). Teams should work together to identify at least one goal that is based on the findings from Step 2.

Before establishing the goal, teams should consider the following questions:

- What do we want to accomplish? What do we want to happen?
- Why do we want to accomplish this? What issues will the goal help to resolve?
- What is the overall desired outcome? How will we know if we were successful? How will we measure success?
- How will we meet our goal? What strategies will we implement to achieve success?
- When can we expect the goal to be completed? What is our timeline (e.g., start and end dates, key milestones, check-ins on progress)?

Step 4 - Create and Implement a Team Action Plan (Team Process)

The fourth step in the inquiry cycle is to create a team action plan. This action plan will help ensure success in accomplishing the goal identified in Step 3. It provides a framework so that team members are clear on the goal, purpose, outcomes for success, strategies, implementation steps, timeline, and support needed.

Step 5 - Reflect (Individual Reflection)

The final step in the inquiry cycle is to reflect on the outcomes and identify next steps. Paraeducators and teachers will individually examine what worked and what didn't work, and identify the next steps for continued professional growth.

Building Winning Teams: Effective Paraeducator-Teacher Teams

Last Revised on Nov 13, 2022

Reflecting on what you have learned about yourself, your partner, your team, and the characteristics of effective teams will cement learning, further improve team effectiveness, and encourage continued professional growth.

Submission Guidelines & Evaluation Criteria

To earn the micro-credential, you must receive a passing score in Parts 1 and 3, and be proficient for all components in Part 2.

Part 1. Overview Questions (Provides Context)

(250-350 words)

Please use the suggested word count as a guide to answering the following contextual questions. This will help our assessor understand your current context for working on this micro-credential.

- Describe the context of the classroom or setting in which you work (e.g., general ed classroom, resource room, community-based setting). Include grade level, subject area, any relevant cultural/demographic information, and special considerations regarding student characteristics.
- Describe the makeup of your team (whom you work with regularly to directly support students). Include who is on your team (i.e., teachers, paraeducators, related service providers/SISP), each team member's roles/responsibilities, and how long you have worked together.
- What did you know about the five "knows" of collaborative teaming before any information or resources were made available to you?
- How do you currently acquire knowledge around the five "knows"? Explain why you chose to complete this micro-credential.

Passing: Responses should completely answer each question, cite specific examples from personal experience, and justify the reason for choosing this micro-credential to address the specific needs of both the paraeducator teacher team and students. Writing is organized and easy to understand.

Part 2. Work Examples/Artifacts/Evidence

To earn this micro-credentials please submit the following **three** artifacts as evidence of your learning. Templates can be found in the Resource section.

Except where otherwise noted, this work is licensed under:

<http://creativecommons.org/licenses/by-nc-nd/4.0/>

Building Winning Teams: Effective Paraeducator-Teacher Teams

Last Revised on Nov 13, 2022

**Please do not include any information that will make you or your students identifiable to your reviewers.*

Artifact 1: Inventory

Using the template provided, submit the inventory to assess and reflect on:

- Your knowledge within each of the five "knows"
- The current process or strategies your team uses to acquire knowledge around the five "knows"
- The "knows" that you think impact your team's effectiveness in meeting student outcomes including the issues and challenges contributing to the situation and the tools, resources, or methods that could help acquire knowledge in that area.

Note: Paraeducators and teachers must complete this artifact independently.

Artifact 2: Team Action Plan

Using the template provided, submit a team action plan around at least one SMART goal identified. The goal and strategies should relate to the characteristics of effective teams.

Note: Paraeducators and teachers should complete this artifact together. They can submit the same action plan.

Artifact 3: Implementation Evidence

Complete the following two parts and submit as one document. If the evidence is a video or audio file, you may submit them separately. Artifact should include an indication of your role on your team (i.e., paraeducator, teacher, related service provider/SISP).

Part 1

Submit one piece of evidence that demonstrates the implementation of at least one strategy identified in your team action plan.

Examples of evidence may include but are not limited to:

- the team mission statement
- the team "why" statement

Except where otherwise noted, this work is licensed under:

Building Winning Teams: Effective Paraeducator-Teacher Teams

Last Revised on Nov 13, 2022

- team goals and/or norms
- roles and responsibilities agreements
- expectation agreements
- meeting schedules/logs
- meeting agendas
- meeting minutes
- recordings/transcripts of meetings
- pictures of communication boards
- daily communication calendars
- classroom schedules
- professional learning certificates of completion
- problem-solving forms
- planning forms
- work style preference inventories
- personal values assessments
- organizational commitment surveys

Part 2

Using the template provided, reflect on and describe how the evidence and strategy implemented supports the five "knows" of collaborative teaming and how they have impacted team effectiveness and students.

Note: Paraeducators and teachers can submit the same piece of evidence (Part 1), but they must complete the reflection component (Part 2) independently.

Part 3 Reflection

(250-350 words)

Use the word count as a guide to writing a personal reflection about your work on this micro-credential. For tips on writing a good reflection review the following resource:

[How Do I Write a Good Personal Reflection?](#)

Please do not include any information that will make you identifiable to your reviewers.

1. How has this experience affected you in your role as a paraeducator or teacher?
2. How do you envision using this process with existing or new team members in the future?

Passing: Reflection provides evidence that this activity has had a positive impact on both educator practice and student success. Specific examples are cited directly from personal or work-related experiences to support claims. Also included are specific actionable steps that demonstrate how new learning will be integrated into future practices.
