Note: This micro-credential is the seventh of eight in the Community Schools stack. The micro-credentials in this stack follow a sequence to best support educators in developing their capacity to support community schools.

7. Using Driver Diagrams to Map Primary and Secondary Drivers

Stakeholder teams create Driver Diagrams with specific measurable goals to prioritize change ideas.

**Key Method**

The stakeholder teams (using their fishbone diagram) create a Driver Diagram based on an identified high-leverage item by creating an Aim Statement and determining drivers of change, followed by identifying change ideas to guide PDSA (Plan-Do-Study-Act) cycles.

**Method Components**

**Pre-Work**

An identified high-leverage item (as determined in the preceding micro-credential) should be selected to complete a Driver Diagram.

*A Driver Diagram is a visual display of a team’s theory of what “drives,” or contributes to, the achievement of a project aim. This clear picture of a team’s shared view is a useful tool for communicating to a range of stakeholders the ways in which a team is testing and working.* - Institute for Healthcare Improvement. (Refer to resources for an example).

**Create an Aim Statement**

*An Aim Statement is a goal for an effort to improve a situation that answers the question, “What are we trying to accomplish?”*

An Aim Statement needs to follow the SMART (Specific - Measurable - Attainable - Relevant - Timely) criteria

- Clearly state what you are trying to accomplish for what or whom.
- Include a “Stretch Goal” – a measurable target that is challenging but achievable.

*Example: By May 2019, attendance (on-time and all day) will increase for all students at Risley Middle School from 80% to 95%.*
Determining Primary and Secondary Drivers (Drivers of Change)

A “driver” is an action or statement proposing an improvement and should include words such as increase/decrease; improve; start/stop, etc.

Example of a Primary Driver: Increase the number of after-school extracurricular activities

Example of a Secondary Driver: Increase the number of students who have undergone physicals

Identify Change Ideas

A change idea is a modification to a system, process, or practice that will be tested and studied to examine its effectiveness in relation to improvement toward an aim.

Stakeholder groups should brainstorm change ideas for each secondary driver.

Next Steps: Moving Toward PDSA Cycles (the next micro-credential)

Assess each change idea to determine which you will test/implement first via a PDSA cycle:

- Will it be easy or hard to implement?
- What will it cost?
- How long will it take?
- How many people have to be trained?
- Will it have a significant or insignificant impact on the aim statement?
- Is it within your sphere of influence?

Submission Guidelines & Evaluation Criteria

To earn the micro-credential, you must receive a passing score in Parts 1 and 3, and receive a proficient for all components in Part 2.

Part 1. Overview Questions

250-word limit

Please answer the following contextual questions to help our assessor understand your current situation. Please do not include any information that will make you identifiable to your reviewers.

1. What is your Aim Statement?
2. What are your primary and secondary drivers and why were they selected as a focus for action or improvement?
3. What are your change ideas (possible solutions or interventions for each secondary driver)?

Passing: Response provides reasonable and accurate information that justifies the reason for choosing this micro-credential to address specific needs of both the teacher and the student. Educator includes a learning goal that describes what they hope to gain from earning this micro-credential.

Part 2. Work Examples / Artifacts

To earn this micro-credentials please submit the following two artifacts as evidence of your learning. Please do not include any information that will make you or your students identifiable to your reviewers.
**Artifact 1: Evidence of Group Participation**

Submit annotated evidence of active group participation in the three key phases of the process and clearly label each part of the following process.

- Identify your high priority need or needs.
- Define your problem or problems
- Analyze, group, and categorize the root causes you have identified.

This evidence could be in the form of:

- A photo essay with annotations that tell the reviewer about the process.
- Charts or graphic organizers outlining your decision-making process.
- Agendas or meeting notes.

**Artifact 2: Driver Diagram**

Complete and submit a Driver Diagram template linked in the resource section.

**Reflection**

300-word min to 500-word max

Please answer the following questions for reflection. Please do not include any information that will make you identifiable to your reviewers.

1. Compare this process to past problem-solving sessions you have participated in to identify solutions or interventions.
2. What impact do you believe your prioritized change idea will have on students?
3. Which change idea do you intend to move forward with to perform a PDSA cycle on and why did you prioritize this one?

- **Passing:** Reflection provides evidence that this activity has had a positive impact on both educator practice and student success. Specific examples are cited directly from personal or work-related experiences to support claims. Also included are specific actionable steps that demonstrate how the new learning will be integrated into future practices.
