Great Public Schools for Every Student

Teaching the Teacher: The Importance of Continuous Learning

Educator demonstrates the impact of continuous professional development and its application on their own teaching practice and student success.

Key Method

The educator designs a professional growth plan that employs various deliveries of professional development to address individualized learning goals. The educator understands that reflection, as a result of the professional development plan, aids in the building of pedagogical skills to support student success in the classroom environment.

Method Components

Educators understand that continuous learning throughout their professional careers allows for their instructional practices to remain relevant and engaging to their students. They realize that through reflection, areas of improvement can be identified for an individualized professional growth plan. Once identified, educators can select professional development opportunities that will best aid them in achieving progress towards their goals and meeting the learning needs of students. Educators adapt these practices, when necessary, as classroom dynamics change and as professional skills evolve.

Key elements of continuous professional learning:

- Professional goals are crafted after a needs assessment is conducted.
- Professional development is offered in a variety of delivery methods to allow the educator to choose the type that works best with their personal and professional obligations.
- The professional development content is research-based and keeps up with current practices.
- The professional development content can be applied and adapted to a variety of classroom settings.
- Application of knowledge gained from professional development benefits overall student success in the classroom.

Supporting Research

The chapter describes elements that contribute to a new way of framing professional development as a continuous and collective process of professional learning. Such essentials call for rethinking how leadership is shared with teachers and how teachers accept collective responsibility for learning and instructional decision making.

Hord, S. 1997. Professional learning communities: Communities of continuous inquiry and improvement. Austin, TX: Southwest Educational Development Laboratory.

This research review articulates requirements for effective professional learning communities: supportive and shared leadership, collective creativity, shared values and vision, supportive conditions (physical and personal), shared practice, and peer support.

Teaching Teachers: Professional Development To Improve Student Achievement

### Submission Guidelines & Evaluation Criteria

To earn the micro-credential, you must receive a passing evaluation for Parts 1 and 3, and receive a Proficient Rating in each component in Part 2.

**Part 1. Overview Questions**

200 word limit for each response

Please answer the following questions:

Describe a recent professional development experience in which you have been a participant. What were elements that made the sessions successful for you? What were elements that you would have changed?
How have you determined your professional needs? Explain how your professional goals are chosen and how that impacts your views toward professional development.

- **Passing**: The written response explains, with supporting details, the educator’s professional development experiences and the process in which professional goals are chosen. The response is clear and well organized.

**Part 2. Work Examples / Artifacts**

To earn this micro-credential, please submit the following artifacts:

**Artifact 1: Professional Growth Plan**

A Professional Growth Plan that identifies one learning goal that you would like to accomplish. The Plan should include the following components:

- A clear statement of the goal selected (What do I want to learn?)
- An explanation of the purpose of the goal (Why do I want to learn this? How is this connected to the learning needs of students?)
- Barriers to the goal (What could keep me from accomplishing the goal?)
- Resources
- The professional development course and delivery chosen (What will I take to achieve my goal?)
- Evidence of Progress (How will I show what I have learned?)
- Expected Outcomes (What will I and/or my students be able to do as a result?)
- Timeline (When am I expected to show completion of this goal?)

**Artifact 2: Synopsis**

Submit a synopsis of the Professional Development activities you are participating in to achieve your identified goal. In a written submission, respond to the following (750-word limit total):

- How does the delivery method of the Professional Development activity affect your Professional Growth Plan?
- How was the learning in the professional development activities applied to your classroom?
- What was the impact on student learning?

</table>
### Artifact 2: Synopsis

The Professional Development activities are directly aligned with the Professional Growth Plan and the submitted standards. The written submission clearly supports the chosen delivery methods of the professional development activities.

Grammar, spelling, sentence structure enhance clear communication.

---

The Professional Development activities are aligned with the Professional Growth Plan and the submitted standards. The written submission somewhat supports the chosen delivery methods of the professional development activities.

Grammar, spelling, and sentence structure allow for clear communication.

---

The Professional Development activities are not aligned with the Professional Growth Plan and the submitted standards. The written submission is inconsistent in supporting the chosen delivery methods of the professional development activities.

Grammar, spelling, and sentence structure may inhibit clear communication.

### Reflection

200-word limit for each response

Please answer the following:

How did the creation of the Professional Growth Plan help you reflect on your own teaching? Reflect on each component of your Professional Growth Plan and how that will impact your future approach to Professional Development.

How do you envision using this process to address future student needs? Reflect on your work within this micro-credential and how it can apply to your future practice.

- **Passing:** Reflections clearly express an understanding of how the Professional Growth Plan has impacted the educator's practice. The written response is reflective on the process using specific examples and is clearly written and well organized.
