The Education Support Professional (ESP) prioritizes, plans, and executes tasks efficiently and effectively.

**Key Method**

A five-step inquiry learning cycle will help you demonstrate organization that connects to your students and their communities. It is through self-assessment, analysis, and reflection that you can learn about yourself as a professional: one who works in an organized manner, positively influences others, and plans for evidence-based growth in the Organization Standard of the ESP Professional Growth Continuum.

**Method Components**

Many professions have guiding principles that provide a blueprint for organized professional knowledge and practice, workload management, and decision-making. Whether or not you realize it, you make daily decisions that affect the well-being of students and staff, as well as the culture and mission of public education. Others entrust you with completing work in a timely and fiscally responsible manner to ensure optimal teaching and learning conditions.

Together, the Whole Student Model and the inquiry learning cycle described below provide you with a self-guided, professional growth road map to the Organization Standard.

**Components of Using the ESP Professional Growth Continuum’s Organization Standard**

- Consider how organization supports the whole student
- Determine your own level of organization by studying the standard closely to understand specific knowledge, skills, and dispositions and how they change from one level to the next
- Identify areas for growth in organization that will benefit you professionally, others, and your career family
- Generate and execute a plan to grow in the Organization Standard

(See Resources section)

**The Whole Student Model**

The five tenets of the Whole Student Model parallel Maslow’s hierarchy of needs by describing the relationship between the well-being of students and their readiness to learn. Students cannot
learn unless they are first healthy and safe, and they are more likely to learn if educators engage, support, and challenge them. The tenets should guide and inform your organization practices.

**The Inquiry Learning Cycle (Your Learning Journey)**

![Inquiry Learning Cycle Graphic](image)

**Know the Organization Standard**

- The indicators and descriptors of the standard detail what you should know and be able to do regarding organization in your career family role.

- Study the standard (see the *Professional Growth Planning Tool* or PGC Self-Assessment in Resources). Own the knowledge, skills, and dispositions that characterize your use of organization, that of those around you, and for others within your career family.

**Know Yourself**

- Knowing where you currently fall on the professional growth continuum and being able to describe your practice around organization is a critical first step to intentional growth in the standard.

- Knowing the students you serve and their needs will ground your work in the importance of the Organization Standard.

- You also need to understand why you do what you do and what the needs are behind the decisions you make.

**Set a Growth Goal**

- Setting goals that are rooted in the details of the Organization Standard will guide you to maximize your potential to help the whole student.

- Comparing what you know about organization with what you know about yourself and the needs of your students around this standard will help you develop a professional vision that serves your passion and your students.
The Why (your passion or purpose) ⇔ The What (the standard's continuum)

+ The How (inquiry cycle - building your knowledge)

◊ Whole Student

+ You

Role Model (RM)/Leader (L)/Mentor (M)

Follow Your Organization Growth Plan

- Designing and implementing an organization growth plan will help you gain the knowledge, skills, and dispositions you need to develop and strengthen your professional practice. When designing your plan, make sure to include the following to ensure your plan moves you forward:
  - Steps you will take
  - Resources you will tap (what does your association offer?)
  - Timelines you will meet
  - Milestones or check-ins on your progress

Reflect

Reflecting on what you have learned about yourself, the Whole Student Model, and the Organization Standard will cement your learning. In turn, what you notice through reflection will help you make plans for continued growth. Reflection is both the final step in the inquiry learning cycle and micro-credential submission as well as a habit of continuous improvement.

Self-Reflection and Professional Growth Planning

Submission Guidelines & Evaluation Criteria

To earn the micro-credential, you must answer the questions with a passing score in Parts 1 and 3 and receive a proficient score for all components in Part 2.

Part 1. Overview Questions

250-350 words

Please answer the following contextual questions to help our reviewer understand your current situation. Do not include any information that will make you or others identifiable.

1. List your ESP career family, specific position, and number of years working in education.
2. Describe your school/work site’s level (healthy, safe, engaged, supported, or challenged) of meeting the needs of the whole student. Explain your choice with the type of specific detail found in the diagram.

- **Passing**: Responses completely answer each question and include specific examples that clearly illustrate intentional use of the standard and the Whole Student Model. Writing is organized and easy to understand.

Part 2. Work Examples / Artifacts

To earn this micro-credential, please submit the following **three artifacts** as evidence of your learning. Please do not include any information that will make you or your students identifiable to your reviewers. You will need to use the Inquiry Learning Cycle and the PGC – Professional Growth Planning Tool or PGC Self-Assessment (both in the Resources section) to complete the evidence listed below.

Artifact 1: Professional Vision Statement

(250–350 words)

Using specific details from both the Whole Student Model and the Organization Standard (see Resources) create a professional vision statement that makes a case for pursuing growth in this standard. Make sure your statement includes all of the following:

- Why you do the work of an ESP
- Why you want to grow in this standard and what specifically is in the standard that ignites passion for your work (see indicators – knowledge, skills, and dispositions)
- How the inquiry learning cycle will support meeting your goals

Artifact 2: Professional Growth Plan

Create and execute a professional growth plan template (you may use one of the two templates in Resources or create your own) that helps you learn about yourself and the standard. Include each of the following steps:

- Analyze and dissect the Organization Standard
- Identify your level of practice in the standard as you start your growth plan
- Establish growth goals
  - Identify growth goals (aligned to the indicators)
  - Identify any professional role aspirations: Role Model (RM), Mentor (M), or Leader (L)
- Describe how your growth action steps contribute to the learning environment
**Artifact 3: Documentation of Organization**

Provide documentation (review the descriptors for your career family to identify possible examples) from your daily work that demonstrate organized professional knowledge and practice, workload management, and/or decision-making in support of a safe, productive, and positive learning environment for students, staff, and/or community.

</tbody>
</table>
**Artifact 3: Documentation from Daily Work**

**Proficient**
- Documentation clearly captures daily work demonstrating organization knowledge and skills as defined by the standard.
- Clear evidence of prioritizing, planning, and executing tasks efficiently and effectively in support of a safe, productive, and positive learning environment.
- Clear evidence of prioritized decision-making that supports efficient systems serving students, staff, and/or community.

**Basic**
- Documentation captures daily work demonstrating some organization knowledge and skills as defined by the standard.
- Incomplete evidence of prioritizing, planning, and executing tasks efficiently and effectively in support of a safe, productive, and positive learning environment.
- Some evidence of prioritized decision-making that supports efficient systems serving students, staff, and/or community.

**Developing**
- Documentation does not capture daily work demonstrating organization knowledge and skill as defined by the standard.
- No evidence of prioritizing, planning, and executing tasks efficiently and effectively in support of a safe, productive, and positive learning environment.
- No evidence of prioritized decision-making that supports efficient systems serving students, staff, and/or community.

**Reflection**

250–350 words

Answer the following reflective questions. Do not include any information that will make you or others identifiable to your reviewer.

- Reflect on your growth in the Organization Standard by describing what you have learned about your practice through the inquiry cycle. Be sure to identify your level of competence (Foundational, Proficient, or Advanced/Mastery) before following a professional growth plan, as well as your level after following your plan. Use your Professional Vision and Professional Growth Plan to guide your response.
- How does your growth in the standard impacts students?
- Identify your next steps for continued growth and leadership in the standard.

**Passing:**

- Responses clearly and completely answer all aspects of each question and include personal examples and supporting evidence that clearly illustrate intentional use of the standard and the Whole Student Model. Writing is organized and easy to understand. ESP supports claims with specific examples of next steps taken from personal or work-related experiences.
